Subject: Cleanup of Willamette River - no Fish Advisories

I want to be on record as OPPOSING a cleanup plan that will require continuing Fish Advisories.

You've had 15 years, since declaring the area a Superfund site, to assess the scope of the problem, and it is criminal to leave contaminants in the river and sediment that make it unsafe for fish, other river animals, and humans!

The Willamette is MY RIVER, and we all deserve a clean and healthy one. Your job should be to remove as much contamination as possible, leaving us with a river that's safe to swim in and eat from. Polluters need to pay to have the cleanup done – and you know who they are.

Letting the river take her course, and hoping she'll cover up the pollution – eventually – is not a good solution. Please choose a plan that gives us back a health, clean river.

Thank you.
